

Community Acceptability Meeting

Agenda

- 6:00 Welcome & introductions. Have group assignment process planned before sign-in and name tags.
- 6:05 Recap briefly what was explained at October 17 meeting.
- 6:10 Provide an overview of cleanup options used at similar sites.
- 6:25 Turn over facilitation to Nancy. Nancy will explain the goal to generate sets of criteria for evaluating the acceptability of a remedy to the regional community. She will explain the small group brain-storming process (see instruction sheet for small groups).
- 6:30 Break into small groups with tables, easels and facilitators.

Answer the question:

What outcomes or characteristics would make a cleanup remedy most acceptable to you?

Note: Do not duplicate the other eight Superfund criteria.

- 7:15 Take a break as small groups reconvene and facilitators bring sheets to the front of the room. The individual criteria cards are assembled into large thematic topics common to all the groups.
- 7:35 Nancy reviews the themes of criteria generated by the small groups. She asks for participants and/or facilitators to clarify if there are questions about the meaning of criteria listed on cards.
- 7:50 The participants each have five colored dots that they are to place on Post-It cards at the front of the room to indicate their sense of the relative weight to be given to a particular criterion in determining overall community acceptability of a remedy.
- 8:00 Nancy summarizes for the group the results of the weighting process and explains how these results will be used in the feasibility study for the site.
Adjourn.
